

## Paving, Cubes, Cobble stones, Cube dices

1. class (+/- 0.5 cm)

Precisely handmade,

Slightly undercut,

Plane surface

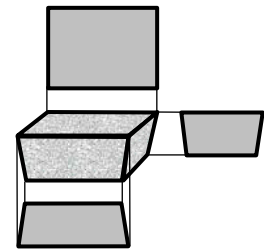

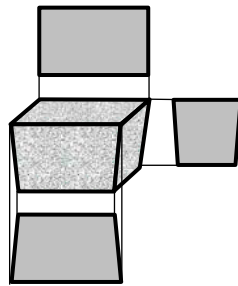

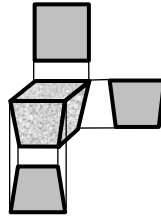

Granite: Cleaved, Pointed, hammered

Basalt: Cleaved

Sandstone: Cleaved

For arch and line

Measurement: see  
list of products

AKIUCO-Paving stones are all precisely made by hand and slightly undercut. All surfaces are worked nice and plane. The surfaces of granite can be pointed and hammered, those of basalt and sandstone are nicely cleaved.

The precision of AKIUCO-Paving stones enables a fast and accurate laying, no waste of paving, high productiveness, small joints and as a result a nice looking work.

STONE T&V can produce paving stones in all required measurements and executions. There are two main versions, one for arch and one for line.
