Handmade (+/- 0.5 cm)  
Sides & bottom pointed  
Process of surface with  
Granite: Pointed & hammered  
Basalt: Flattened  
Sandstone: Flattened  
Measurements: see list of products

The natural AKIUCO-Paving Slabs are handmade and give a rustical impression. The slabs are often used in original and historical environments, such as old buildings or gardens close to nature.

The slabs are cleaved and moulded by hand. The surface is leveled by pointing, hammering or flattening. Due to the dead load and the pointed areas, the paving slabs lie very stable.

The natural AKIUCO-Paving Slabs you can get in different kinds of stones, measurements and colours.
