

akiuco[®]-Wall System
 (more information on special sheet)

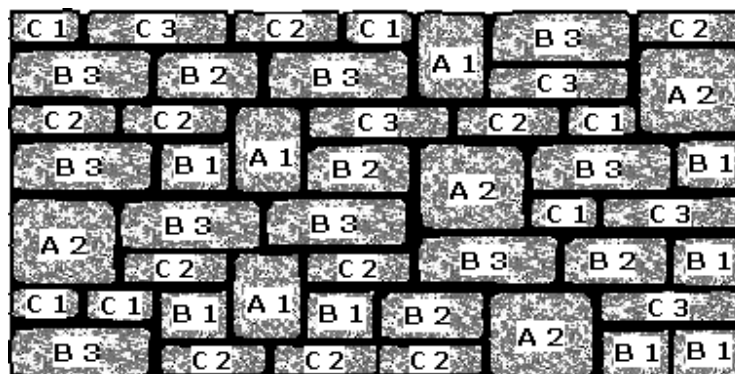

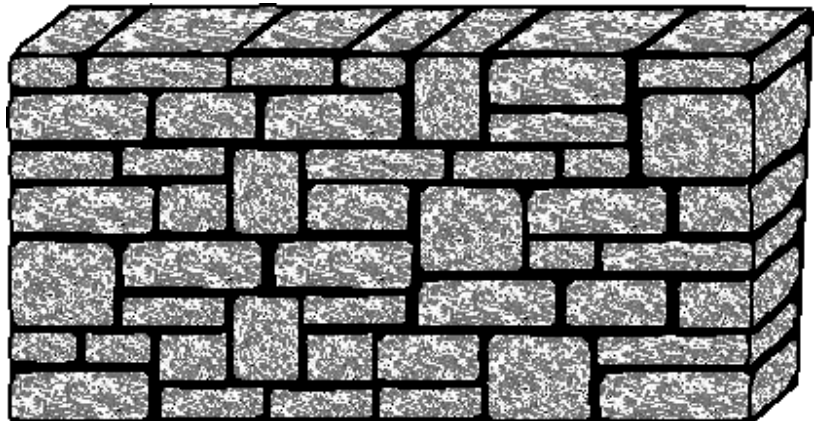

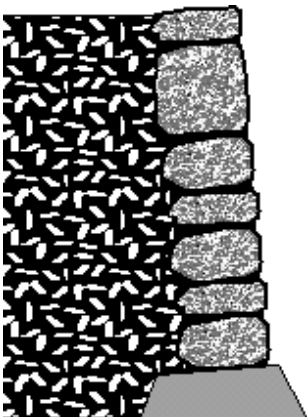

Handmade (+/- 1 cm)
 All sides processed
 Granite: Cleaved & refind
 Basalt: Cleaved & refind
 Sandstein: Cleaved & refind
 Measurement - Plan: see special sheet

With the AKIUCO-Wall System you can build walls fast and uncomplicated. Each stone has been processed on all sides and must not be refined on the construction site. The stones can be set by plan and the result will be a wall with natural impression.

Each set of stones contains 48 pieces in different sizes. One set is about 2 m² of wall area. The height and length of the wall can be varied easily. Because of low dimensions and weight, the pieces of stone can be handled very good by hand.
